

Product Backlog

4

Product Backlog Items are all engineering tasks or horizontal architectural components/items.

Avoid

Backlog items should not be engineering tasks or architectural items, since they are very hard to deliver in short Sprints. However, removing technical debt is a sensible backlog item, if it requires effort beyond the normal refactoring that happens during development.

Product Backlog

The Product Backlog is supplemented by other artifacts that help provide context (like product vision, product roadmap).
