

Product Backlog

10

Product Backlog Items are estimated, typically using some relative estimation approach by the Team.

Good Practice

The Product Backlog Items do not have to be estimated, but they often are, and the Team is the only party who can provide the estimates. The PO and stakeholders may certainly ask why certain item is of certain size, and the Team must be able to explain.

Product Backlog

11

It is sufficient to group rank the Product Backlog Items, e.g. to Must-Haves, Should-Haves, Could-Haves.
