Product Backlog

12

The Product Backlog is flexible – items can be added/removed/edited at any time – but items in current sprint are locked.

Rule

The Product Backlog is expected to reflect the PO's best knowledge at any time, but items committed to Sprint Backlog are locked to give the team some stability to focus on getting things done.

RULE   **GOOD PRACTICE**   **AVOID**

Product Backlog

13

Stakeholders and Development Team members can contribute items to the Product Backlog.
