Product Backlog

20

It's good to store/save all Product Backlog Items, even if they are no longer valuable or are very old.

Avoid

A very large number of stories or old stories suggest that there is little value in most of them. Thus it is often better to just remove them (or at least hide well) and reintroduce as new items (with updated definition) if the requests reappear.

RULE **GOOD PRACTICE** **AVOID**

Product Backlog

21

The Product Backlog is prioritized (or ordered) so that there are no two items at same priority (forced priority).
