Scrum Master

Discuss the cards and select a right category for each of them.

Responsible

The SM is expected to own these and drive them proactively. If a SM doesn't do these, perhaps nobody will.

Actively Avoid

These are responsibilities of other roles, and the SM should actively avoid them. These harm successful use of Scrum.

Helping with

Someone else is responsible for these, but part of SM's job is to help with them.

Scrum is Silent

Scrum is intentionally silent on these. Organisations possibly needing these must agree internally how to handle them.

Scrum Master

1

Training & coaching

Teaching the Agile mindset and Agile frameworks to Team, PO, and stakeholders, coaching them to use the knowledge and activities effectively, yet allowing them to decide for themselves.
